

Efficiency in the palm of your hand.

Seeing beyond

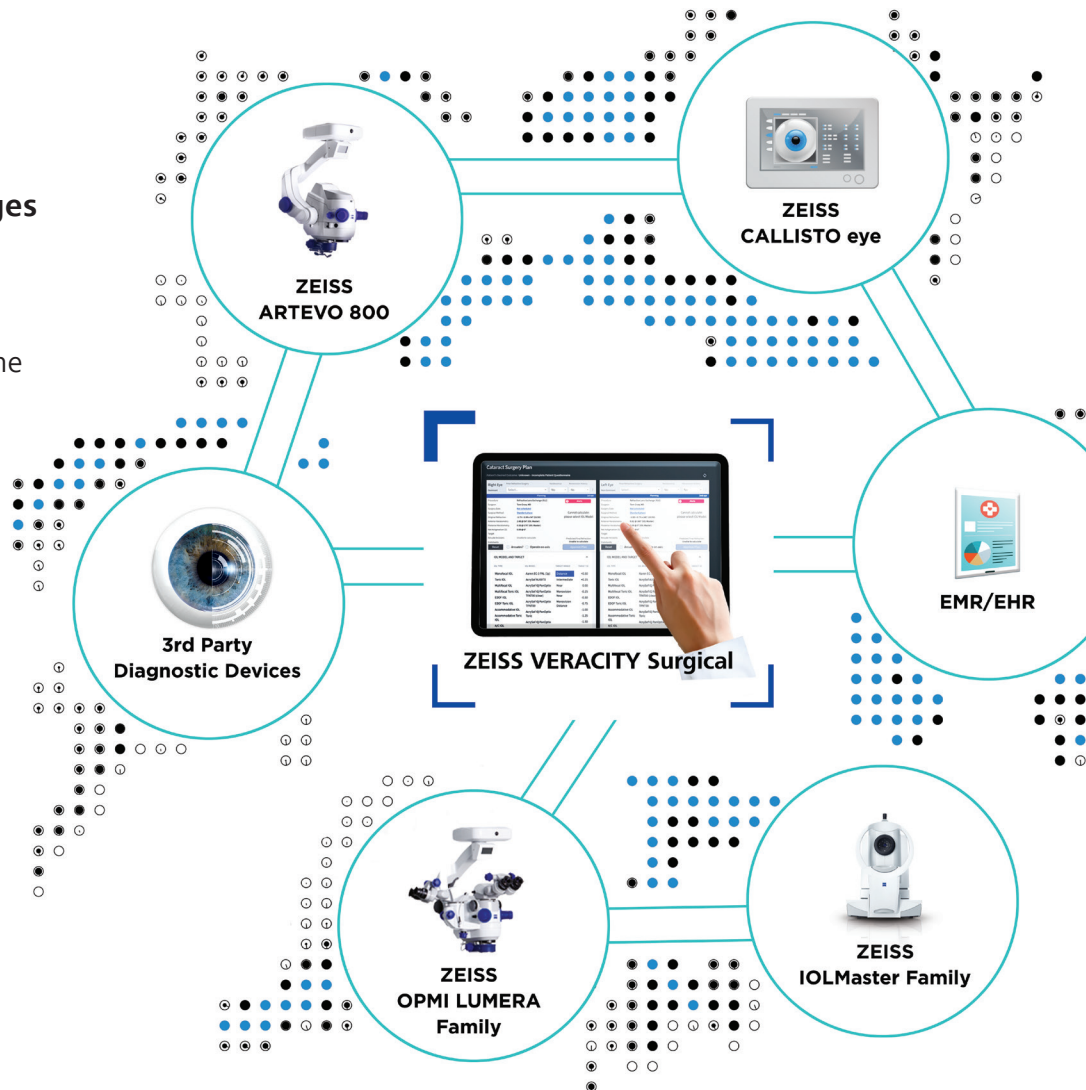

Experience seamless integration of your entire surgical suite within one digital ecosystem.

Overcome increasing challenges in today's practice...

- Reimbursement rates declining
- More patients to see, in less time
- Patient expectations increasing

...With VERACITY™ Surgical

- Planning driven by patients' visual expectations
- Increases premium IOL conversion rates
- Ensures greater patient safety
- Significantly reduces time for planning
- Remote access for flexible working

Less time planning. More time treating.

VERACITY Surgical seamlessly integrates patient data from EHR and diagnostic hardware, so you can put your focus where it belongs—delivering the quality of care your patients expect.

VERACITY Surgical connects and integrates information across:

- Electronic Health Records
- Diagnostic Hardware
- Physician Preferences
- Patient Lifestyle & Expectations

“VERACITY Surgical was easy to implement in my practice, and now I can treat more patients, in less time. Plus, I’ve been able to increase conversion rates for premium IOLs.”

Yuri McKee, MD

The world's first and only refractive cataract surgery planner

Seeing beyond

VERACITY Surgical increases work flow efficiency and automates surgical planning you can access from anywhere.

Right Eye	Prior Refractive Surgery	Keratoconus	Monovision History
Dominant	No	No	Yes - Near

Planning		1st eye
Procedure	Cataract extraction with IOL	Alert Eligible
Surgeon	Surgeon Name	
Surgery Date	01/10/2019	
Surgical Method	Femtosecond laser	
Current Refraction	-1.75 + 2.50 x 54° (20/50)	
Anterior Keratometry	2.42 @ 53° (Barrett Integrated-K)	
Posterior Keratometry	0.34 @ 176° (IOLMaster 700 TK)	
Net Astigmatism (D)	2.39 @ 56°	
Target	Distance	
Arcuate Incisions	None	
Comments		

“Patients today have extremely high expectations for their treatment outcomes, and with VERACITY Surgical I’m more confident than ever about meeting them.”

Yuri McKee, MD

VERACITY Surgical automatically builds a personalized plan that combines your preferences and the visual outcome patients want—so meeting patient expectations has never been easier.

Each personalized cataract surgery plan incorporates:

- Patient medical history (including safety concerns)
- Patient ocular measurements
- Your physician preferences

VERACITY puts analytics to work to help build your practice

With post-op data driven and exclusive analytics, VERACITY Surgical helps optimize the outcomes of future procedures.
